HOW TO FIT YOUR HORSEWARE® RUG

The fit of your rug is extremely important to ensure the comfort of your horse and to prevent rubbing and rug slippage. As horses of the same height at the wither come in variety of shapes and sizes, it is useful to take certain measurements of your horse.

Using a soft measuring tape, measure from **(A)** at the centre point of the chest, across the point of the shoulder and to the point **(B)** at the centre of the tail. When you have the measurement, remove 10cm (4inches) and choose your horse's size from the table below.

Bear in mind that every horse is different and that this table is a guide only.
We have many different styles to suit all shapes and sizes.

RUG MEASUREMENTS

Measurement from A to B			Measurement from C to D EU Back Seam Equivalent
CM	INCHES	FEET	CM
76	30	2'6	50
84	33	2'9	55
91	36	3'0	60
99	39	3'3	65
106	42	3'6	70
114	45	3'9	75
122	48	4'0	80
130	51	4'3	85
137	54	4'6	90
145	57	4'9	95
152	60	5'0	100
160	63	5'3	110
168	66	5'6	115
175	69	5'9	125
183	72	6'0	130
191	75	6'3	140
198	78	6'6	145
206	81	6'9	155
213	84	7'0	160
221	87	7'3	165

LightWeight

MediumWeight

HeavyWeight

Horseware® rugs come in a variety of weights. To make it easy, we've created this little temperature scale. It explains the weight available for each rug and is located under each product section.

A turnout rug acts as a waterproof insulator layer, helping to maintain condition in cold weather. However be aware that conditions may vary in a short time span. Always ensure your horse is comfortable at all times.
